

SLIPPERY DECKING?

..USE ANTI-SLIP DECKING STRIPS

Richco Decking Strips are high performance safety decking profiles, made from high quality GRP (glass reinforced plastic). Wooden decking areas are notorious for becoming slippery when wet or with algae growth, Richco Decking Strips are an easy alternative for those slippery areas and are suitable for DIY installations if required.

Richco Deck-a-Grip is a decorative surface dressing system, which is ideal for the use on driveways, walkways, ramps and steps etc. It can also be used on a wide range of surfacing projects where an attractive decorative finish is required.

Richco Deck-a-Grip provides an attractive, hardwearing, low maintenance surface using a wide range of natural and coloured aggregates up to 6mm in size. Richco Deck-a-Grip is ideally applied onto a concrete sub-base and is designed to give the appearance of loose aggregates without the associated maintenance problems.

Richco Deck-a-Grip uses a high strength polyurea system specially formulated for surfacing applications. It is applied to the fully prepared surface by brush, roller or squeegee and the desired aggregate is then cast upon the surface. Once cured the loose aggregates are then swept clean.

- Low Maintenance
- Hardwearing
- Fast Curing

ANTI-SLIP DECKING STRIPS (Ideal for DIY)

- Easy to Install
- Tough & Durable
- Lightweight
- Choice of Sizes

Richco Decking Strips are high performance safety decking profiles, made from high quality GRP (glass reinforced plastic). They are ideal for use in high traffic walkways, decking areas, pontoons, ramps, access bridges etc.

Wooden decking areas are notorious for becoming slippery when wet or with algae growth, Richco Decking Strips are an easy alternative for those slippery areas and can be installed for your own DIY projects.

Richco Decking Strips are also suitable for installation in any high trafficked areas where a quick anti-slip solution is required.

Richco Decking Strips are quick and easy to install and are available in a range of colours and sizes and are suitable for DIY installations if required.
